

Capparis mitchellii — Native Orange

Scientific Name:

Capparis mitchellii

Common Name:

Native Orange

Register Number:

30

Location of Tree:

Lot 9036, Corner of Basso Road and Stuart Highway, Alice Springs NT

GPS:

-23.66871, 133.87004

Categories of Significance:

Aesthetic
Size
Unique Location

Year Listed:

2001

This Native Orange was a fine example of the species. This healthy specimen had survived the development of the industrial site and grew to quite a significant size. It provided an important contribution to the landscape as an example of remnant native vegetation. Unfortunately due to continued development of the site, it was cut down during the early 2000's.
