

Ficus virens — Banyan

Scientific Name:

Ficus virens

Common Name:

Banyan

Register Number:

102

Location of Tree:

Old Town Hall ruins, Smith Street, Darwin NT

GPS:

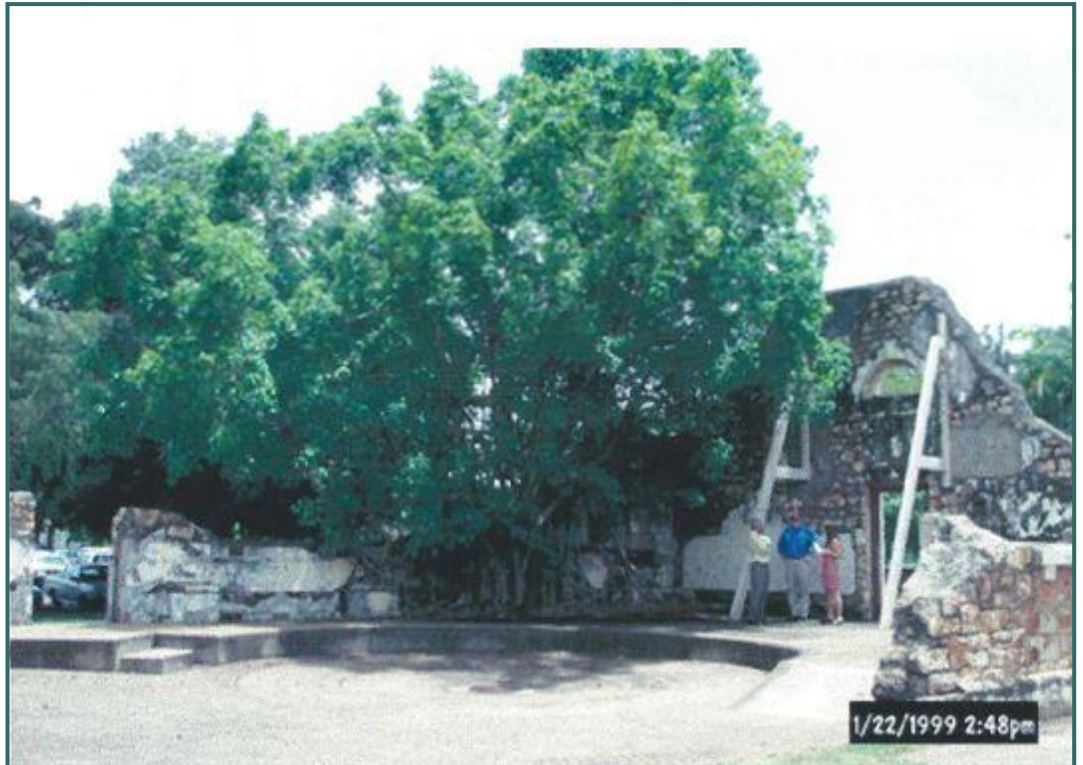

-12.4656, 130.84375

Categories of Significance:

Aesthetic
Unique Location

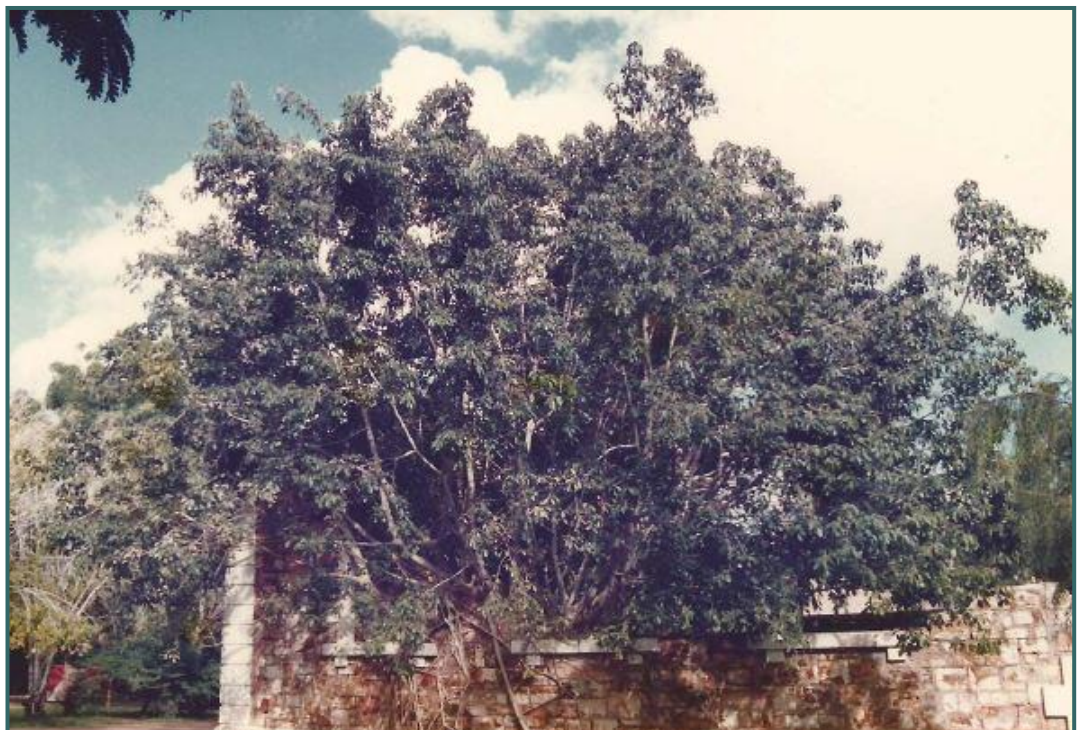

Year Listed:

1989

It is interesting the way the roots of the Banyan were growing through the brickwork of this old building. Because the tree was growing with the wall it was almost rectangular rather than circular.

Ironically enough, the very healthy and happy tree has since been removed as it was causing damage to the ruins of the heritage building.
