

Cycas armstrongii — Cycad

Scientific Name:
Cycas armstrongii

Common Name:
Cycad

Register Number:
160

Location of Tree:
Territory Auto Auctions, Lot
1347 Sadgroves Crescent,
Winnellie, Darwin NT

GPS:
-12.42708, 130.87005

Categories of Significance:
Size
Unique Location

Year Listed:
1992

This Cycad located in the industrial heartland of Winnellie was a part of the remnant vegetation which once covered the entire Darwin area.

This specimen had attained a good height in spite of its adverse surrounding. Its proximity to the fenced boundary probably contributed more to its survival than benevolent land owners, as the surrounding soil was saturated with oil and wastes. Scars from the deciduous fronds indicated seasonal growth.

Due to development in the industrial area, this cycad no longer exists.
