

Cryptocarya cunninghamii — Coconut Laurel

Scientific Name:

Cryptocarya cunninghamii

Common Name:

Coconut Laurel

Register Number:

163

Location of Tree:

54 (Lot 475) Progress Drive,
Nightcliff, Darwin NT

GPS:

-12.38768, 130.8489

Categories of Significance:

Aesthetic
Unique Location
Horticultural Value

Year Listed:

1992

Coconut Laurels provide a roosting site for birds, which then drop the seeds of other native tree species underneath. Seedlings that have since germinated can be observed in the leaf litter below the trees.

This Coconut Laurel was one of the largest known specimens from the local Darwin area. Unfortunately, this tree has been removed.
