

## *Cycas calicola* — Cycad

**Scientific Name:**

*Cycas calicola*

**Common Name:**

Cycad

**Register Number:**

181

**Location of Tree:**

Litchfield Park, Litchfield NT

**GPS:**

-13.20526, 130.71348

**Categories of Significance:**

Unique Location  
Group

**Number of Trees:**

Many

**Year Listed:**

1994

*Cycas calicola* is endemic to the Northern Territory, occurring in isolated populations between Katherine and the mouth of the Daly River. Populations of this Cycad occurring at Tolmer Falls and Sandy Creek have been accepted to the Register. They represent a good example of this restricted community displaying high aesthetic values and providing an important contribution to the landscape.
