

Cycas armstrongii — Cycad

Scientific Name:
Cycas armstrongii

Common Name:
Cycad

Register Number:
49

Location of Tree:
George Brown Darwin Botanic
Gardens, Gardens Road,
Darwin NT

GPS:
-12.44523, 130.83673

Categories of Significance:
Age
Unique Location

Year Listed:
1986

These Cycads are significant by virtue of them being remnant of the original peninsula flora. The only other survivors are at 68 Mitchell Street. This particular group, because they are situated in the periphery of the block, could easily be incorporated in any future landscape plan.

In March 1989 a new office development was proposed. This resulted in the relocation of the Palms to the Darwin Botanic Gardens from Searcy Street in 1990.
