

## *Ficus virens* — Banyan

**Scientific Name:**

*Ficus virens*

**Common Name:**

Banyan

**Register Number:**

82

**Location of Tree:**

Mirambeena, 64 Cavenagh Street, Darwin NT

**GPS:**

-12.45935, 130.84009

**Categories of Significance:**

Unique Location  
Group

**Year Listed:**

1988

The *Ficus virens* is a strangler fig. It often begins as an epiphyte in the fork of a host tree, producing aerial roots which eventually encircle and kill the host tree. This Banyan is another fine example of remnant vegetation still remaining in the Darwin area.
