Categories of Significance:

Age
Historical

Number of Trees:

11

Date Planted:

Pre-WWII

Year Listed:

1992

These Frangipani, Poinciana and Gmelina trees located at the Parap Village Holiday Apartments were planted by personnel from the original Darwin airport which ran along Ross-Smith Avenue. These trees are probably amongst the oldest introduced trees outside of the Botanic Gardens. It is encouraging to see that these old beauties have remained despite the considerable development of the site. Their gnarled trunks contrast markedly with the youth of the buildings which now surround them.
