

NT SOIL SYMPOSIUMS

EVENT DETAILS

Territory Natural Resource Managements Symposiums are a day focused on recognition of the importance of healthy soil in farming and living systems. Expert presenters will cover topics such as soil carbon, biology, fertility, soil erosion, and current activities being undertaken in the Northern Territory to improve soil health and condition.

The symposiums are open to farmers, backyard gardeners, and anyone with an interest in the world beneath their feet. The first of its kind in the Northern Territory and with a mix of national expertise and local experience, this is a free symposium you will not want to miss.

Arts and Culture Centre

SPEAKERS

Dr Charles Massy (Author &
Regenerative Farmer)

His latest book, Call of the Reed Warbler: A New Agriculture - A New Earth, is about the regenerative farming revolution and its capacity to heal both Earth and human health.

Dr Pauline Mele (Soil CRC)

Pauline is a soil microbial ecologist with more than 30 years' experience researching three way interactions between the soil, plant and associated biota and figuring out how this biology influences both plant productivity and soil health

Ted Parish (MLA)

Ted is the adoption manager for northern beef and has a passion for soil carbon. Ted currently promotes Producer Demonstration Sites and Profitable Grazing Systems in the North
